

Ladybug Stones

What you need

- Small round stones
- Red and black paint
- Black permanent marker
- Clear nail polish or varnish (optional)

Instructions

A lot of the fun is in finding the perfect shaped stones - they can be any size but preferably round.

Make sure your stones are clean and dry. Paint $\frac{3}{4}$ of your stones red. When dry paint the other $\frac{1}{4}$ of your stone black for the ladybug's head. Using a black permanent marker draw a line down the middle of the stone from the middle of the head to create wings. Draw or paint seven little spots on each ladybug.

You can paint little eyes on your ladybug or use googly eyes. If you would like your ladybugs to go out in the garden or in a pot plant you can varnish them.
